

Instructions for Spacer with Facemask

1. Shake inhaler.
2. Place inhaler in back of spacer.
3. Place mask over child's nose and mouth. Be sure there is a tight seal.
4. Press down on top of inhaler to release one puff of medication into chamber.
5. Watch child take 5 to 6 breaths. Flow indicator will move back and forth with each breath.
6. Repeat steps 4 and 5 for the second puff of medication.
7. Rinse child's mouth or give child a drink of water.
